

# Education for Street & Dropouts Children

## A Project of TSM

### Greentown Slums, Lahore

Lahore is the second largest city of Pakistan. Its population is almost one and half billion of the total population of Pakistan. People come and settled in Lahore from villages and small cities in order to get educational and job opportunities. There are lots of slums nearby Lahore; green town is the one of them. The population of green town and nearby villages is almost 5 lacs. Three communities are living in this slum, Muslim, Christian and Biharies. People of this slum are poor and mostly live in rented houses. The livelihood of these people is laborers, brickiln and domestic workers. Some are on daily wages and some are earn on monthly basis. They are earning PKR 1000- 4000 per month. Most of the Youth of this slum is involved in drugs and not interested in getting education. 7-14 years old children are living in streets when their parents go to their jobs. Some female children go on work with their parents. Our concern for these children is to give them educational opportunity equally to the school going children. In this regard we as Team of The Shepherd Ministry are initiating a home schooling for these children in their own area and we get them through local committee leaders and Community leaders.

#### **TSM work with:**

Children who spend most of their time on the streets, fendng for themselves, but returning home on a regular basis and children who live on the streets with their families.

#### **Why to do it?**

- ✚ They often have no possibility to attend school.
- ✚ To avoid the sad fate of an uneducated Children.
- ✚ To make the kids aware of health, hygiene and nutrition.

#### **Project Goal:**

- ✚ Much needed opportunities will be given to the destitute, runaway Children for a happy, fulfilling and independent future.

## **Project objectives:**

- ✚ To improve their quality of life by providing them equal education opportunities.
- ✚ To give them hope for a better future.

## **Project Strategy:**

TSM will provide free (informal) basic education including learning materials and uniforms. There is a need for the uplift of the children who quickly lost their childhood. They will learn Mathematics, Urdu language, general knowledge, norms and values of social life. They will learn to develop their physical health by sports and games. TSM will ensure children to make their living better and to rehabilitate themselves as the learned children do.

## **Out come from the Project:**

In three years study plan 45- 135 children will be benefitted. First batch will be in number of 45 children. Annually, academic session of 45 children will be admitted on regular basis.

## **Action Plan:**

We will work in semester system. One year study plan will include 4 semesters of basic studies. Each semester will be for 3-months of period. Special syllabus according to their abilities and nature of their living standards will be prepared for them.

### **First step:**

Provide information on problems essential skills and knowledge to children.

### **Second Step:**

Provide ideas on how the topics can be taught using a variety of teaching methods by imparting knowledge, skills and appropriate attitude in them.

### **Third step:**

Monitoring and evaluating by practical examples are provided to them, can be effectively carried out the impact of the project.

### 3- Years Budget Plan:
